DeWulf Pool Tables

It's only recently that the world has realized concrete can actually be beautiful. Artist James DeWulf has set about making sure people realize just how beautiful concrete—often misconstrued as ugly, brawny and cold construction material—can be. Just another example of this is his Pool Table. Simple and minimal, it will fit perfectly in a contemporary-style man cave or even outside near the pool, as it has been created to be weather resistant and built to pool regulation size. Cue it up at jamesdwulf.com.

Bacon Shaving Cream

Bacon is no longer just America's favorite breakfast meat. It has morphed into every possible thing bacon can be used for. Since we began this magazine, we have featured Bacon Vodka, as well as BaconLube and Bacon Lip Balm, not to mention the bacon-scented soap talked about in this very Man Central. Yet, here we are again: Bacon Shaving Cream. Lather up, shave it down and enjoy the scent of bacon on your face all day long. Let me know when this whole "bacon" thing has gone too far. Until then, check back next time for another bacon-scented item sure to surprise. Lather up at jdfoods.net.
